Forecast for Saturday 18 May 2024

Weather: Low cloud covering summits through the early hours and during the first part of the morning. Cloud lifting and breaking a little after sunrise, with sunny intervals and a chance of showers developing in the afternoon across the park, some of which may be heavy and thundery. Bright through the afternoon, becoming increasingly dry, with sunny intervals. Moderate UV levels expected in the sunny intervals.

Chance of cloud-free hill tops above 800m: 40% becoming 90% through the morning.

Low Cloud and visibility: Cloud down to 700-800m through the early hours, soon rising to above summits in the hours after sunrise. Cloud should remain above summits even in in the heavier showers later. Visibility generally poor in early cloud at elevation otherwise good or very good with clear views of distant hills. Visibility dropping to moderate or poor in any of the heavy thundery downpours later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Hill fog may make navigation tricky if near summits around sunrise. Sun protection advised through the middle and latter part of the day. Torrential thundery downpours may create surface runoff and fast flowing watercourses locally later.

Forecast for Sunday 19 May 2024

Weather: A dry day with long sunny spells. Warm with high UV levels.

Maximum wind: Northeasterly 20mph.

Chance of cloud-free hill tops above 800m: 95%

Low Cloud and visibility: Nil low cloud expected. Visibility good or very good with clear views of distant hills.

Temperature: **Valleys:** Plus 11 Celsius becoming 20 Celsius.
At 800m: Plus 4 Celsius becoming 16 Celsius.
Freezing level: Above summits.
